206	Southampton Twp., Drainage	96002	96002

Vicinity of Jack's Run, proposed drainage improvements

An inadequate drainage system, sedimentation and backwater cause flooding impacts. The Initially Preferred Alternative will replace and upgrade the existing storm drainage system. The section of the ditch between Route 206 and CR 641 will be contained in a drainage easement. This will allow NJDOT to maintain the ditch. Grading will reestablish the umbrella roadway section and adjacent roadway ditches. The IPA would also include repaving of a portion of Route 206 to raise it above the 25-year water surface elevation of Beaver Dam Creek, provide superelevation of a horizontal curve and improve a crest vertical curve. The IPA will mitigate flooding in the 25-year and small storm events.
